## INTUMESCENT PAINT

### SPECIFICATION DETAILS:

**Product Description.** Paint shall be UL listed, water based intumescent type, Class-A Fire Retardant Coating, designed for use on interior surfaces and tested to ASTM E-84. It shall be quick drying, with a flat finish that will reduce the surface burning characteristics of the substrate. When heat or flame is present, the coating will intumesce, forming a thick protective blanket between the fire and substrate, reducing the flame spread.

**Shelf Life.** Paint shall have a shelf life of 1 year

**Coverage.** The paint shall have a minimum coverage of 175 square feet per gallon

**Viscosity.** The paint shall have a viscosity of 90-120

**Packaging.** The paint shall be packaged in one and five gallon pails.

**Origin.** Shall be manufactured in the U.S.A.
